

You can **look** and **sniff**, but don't lick or pick! This keeps you safe and protects the trees.

ENGLISH OAK

These native trees have grown in England for thousands of years. The tree has to be at least 40 years old to produce acorns.

HOLLY

These are a symbol of Christmas. They have glossy leaves all year round and red berries in winter. Photo by Imogen Robinson.

MULBERRY

These trees produce juicy fruits that start out white in summer and turn purple by autumn, when they are ripe. Don't get them confused with blackberries!

COMMON BEECH

These deciduous trees usually grow on chalk. In autumn, they hang on to their leaves for a while after they turn brown.

YEW

These evergreens can often be found in English woods. Photo by Imogen Robinson.

SWEET CHESTNUT

These deciduous trees can live for up to 700 years. They have yellow flowers in spring, which are pollinated by insects and develop into shiny brown fruits, wrapped in a spiky case.

COMMON LIME

These deciduous trees flower in July, providing nectar for honey bees. Their leaves turn yellow and drop in autumn.

DID YOU KNOW?

Some of these trees are deciduous, meaning they drop their leaves in autumn and regrow them in spring. Others are evergreens; they keep their leaves all year round.
